

How does one obtain an Insurance Backed Guarantee for a coating application or concrete renovation?

Document1

1. Fill out (without any commitment) our "Application Form – Insurance Backed Guarantee" as completely as possible and return it by mail, telefax or E-mail.
That is about all you have to do; we will do the rest for you.
2. In order to obtain an insurance backed guarantee, we are asked by every insurer/broker to approve the proposed coating or renovation system in function of the conditions of service and the guarantee period asked for. After having approved this, we send an inquiry to one or more brokers/insurers. After receipt of their quotation, we send you a fax message named "Quotation – Insurance Backed Guarantee" , mentioning the **inspection cost** as well as the insurance **premium**.
3. When you have been awarded the job, just send us back this "Quotation – Insurance Backed Guarantee", duly signed for agreement, but certainly **prior to the start of the works**.
4. At this point, we can start with our inspections. After each inspection, you will receive an inspection report shortly. When the works are completely finished, we will draw up a "Report of Technical Acceptance".
5. A copy of all inspection reports and of the report of technical acceptance is then sent to the broker/insurance company, who's ready to assure the works for the requested period of guarantee.
6. SGS AXA-MED will invoice the inspection costs, the broker/insurer the premium.
The final Insurance Policy will be sent to you by the broker/insurer.

Remarks

- SGS AXA-MED is a specialised, but also fully independant inspection office; we have no commitments with organisations, paint suppliers, brokers, insurers, applicators, etc., whatsoever.
You do not pay any membership fees at all.
You can send us as many requests as you like, and this at no cost for you at all.
- We work together with several brokers/insurers specialised in such technical insurances. Please, do note that SGS AXA-MED is an inspection office and not a broker/insurer. As far as insured projects are concerned, we only act as communicative link between the commissioner and the broker/insurer.
- Thanks to our 6 inspectors, we are always able to answer your questions fast and quickly.
Our Quality and Safety management system will help you upgrade and ensure quality and safety of your project.
All our measuring instruments have an up-to-date calibration status.
- You can always appeal to us for any of the following services:

General technical assistance	Coatings-research & testing (proper coatings-lab)	Technical studies
Specification-writing	Surveys & failure-analysis	Education
- On request, we can also send you our "Prices for Inspections, Surveys and Consulting" pricelist.
